SKILLS SUMMARY

Email: rounikjaiswal2502@gmail.com
Mobile: +91-8103002037
Leetcode: leetcode.com/u/Rounik25

- **Consulting Analytics:** Survey analysis, data cuts, process mapping, dashboarding, insight synthesis, case team support, client-ready deliverables
- **Research & Knowledge Work:** Information structuring, workflow documentation, business problem understanding, quality checks, confidentiality management
- **Analytics & BI Tools:** Advanced Excel, Tableau, Alteryx, Qualtrics, PowerPoint with think-cell, Miro, Mural
- **Programming & Data:** Python, SQL, Pandas, NumPy, scikit-learn, JavaScript, React.js, Vite, Tailwind CSS, REST APIs, FastAPI
- **Core Strengths:** Analytical problem solving, stakeholder communication, attention to detail, structured thinking, presentation development

EXPERIENCE

- **Bain Capability Network** Gurugram, Hybrid
Analyst Intern - Visualization CoE Jan 2026 – Present
 - **Case Team Support:** Supported confidential client and internal cases involving process visualization, survey analytics, dashboard workflows, and insight-ready deliverables for consulting teams.
 - **Process Visualization:** Converted client process documentation and user manuals into an interactive Miro dashboard, mapping execution steps, handoffs, checkpoints, dependencies, and user navigation flows.
 - **Knowledge Asset Migration:** Rebuilt and migrated process dashboards from Miro to Mural while preserving workflow logic, collaboration structure, and confidentiality requirements.
 - **Survey Analytics:** Created Excel-based survey cutters, data cuts, segmentation views, and validation checks to help case teams analyze respondent groups and draw structured insights.
 - **AI-Enabled Dashboarding:** Contributing to an internal agentic AI tool that analyzes uploaded datasets and generates dashboards from user prompts using Vite, React.js, Tailwind CSS, REST APIs, and FastAPI.
 - **Training:** Visualization training across Excel, Tableau, Alteryx, Python, SQL, HTML, CSS, JavaScript, React.js, Tailwind CSS, PowerPoint with think-cell, Qualtrics, and professional development.
- **Center of Disaster Management and Mitigation, VIT Vellore** Remote
AI Model Developer Intern Summer 2025
 - **Predictive Analytics:** Built and optimized machine learning models on cyclone data from 1988 to 2023, achieving 98% accuracy in forecasting cyclone severity in the Bay of Bengal region.
 - **Analytical Reporting:** Prepared analytical reports on AI-driven cyclone forecasts and disaster risk mitigation strategies to support national disaster preparedness insights.

RELEVANT PROJECTS AND CASE WORK

- **Agentic AI Dashboard Generator - Internal Analytics Tool:** Building a prompt-driven analytics tool that enables users to upload datasets, receive automated analysis, and generate dashboards based on natural language prompts.
Tech stack: Vite, React.js, Tailwind CSS, REST APIs, FastAPI
- **Client Process Visualization Dashboard - Confidential Case:** Designed an interactive workflow dashboard from process manuals to help case teams navigate project execution flow, ownership, dependencies, and key process checkpoints.
Tools: Miro, Mural, Excel
- **Survey Cutter and Segment Analysis - Confidential Case:** Prepared Excel-based survey cutters and segmentation views to support survey-driven insight generation, response comparison, and structured analysis for case teams.
Tools: Excel, Survey Data Analysis
- **Excel Org Selection Model - Confidential HR Case:** Developed a dynamic Excel-based organization selection model for a client HR team to allocate open job positions using either existing employee roster selections or new-hire inputs. Built automated field population for role, compensation, level, and related attributes, along with dynamic KPI, summary, and organization structure tabs that updated based on model inputs. Implemented capacity-based row expansion and roster-driven dropdown logic to improve usability and scenario planning.
Tools: Advanced Excel, Data Validation, Dynamic Formulas, KPI Reporting, HR Analytics
- **Regression Analysis - Product Price Prediction Model:** Trained and optimized a Random Forest model for laptop price prediction, achieving an R^2 score of **0.9356**, MAE of **109.56**, and RMSE of **163.43**.
Tech stack: Python, Pandas, scikit-learn - [Link]
- **StockSeer - Financial Data Analytics Pipeline:** Built an end-to-end stock analysis pipeline using technical indicators and sentiment analysis, with an interactive React.js interface for visualization and prediction outputs.
Tech stack: Python, XGBoost, Pandas, yFinance, React.js

EDUCATION

- **Vellore Institute of Technology, Vellore** 2022 – 2026
Bachelor of Technology - Computer Science and Engineering CGPA: 9.08/10
- **R.D. Public School, Betul** 2021 – 2022
12th Grade Percentage: 91.8
- **Paradise Hr. Sec. School, Betul** 2019 – 2020
10th Grade Percentage: 98.3
